SUMMARY

Full-stack developer and Software Engineering undergraduate at the University of Kelaniya, skilled in Spring Boot, React.js, Node.js, Docker, and AWS. Experienced in building and deploying scalable, production-ready web applications with CI/CD pipelines and AI integration. Seeking a Software Engineering internship to contribute and grow in a professional environment.

EDUCATION

University of Kelaniya | B.Sc (Hons) in Software Engineering

April 2024 – Present

Jaffna Hindu College | G.C.E Advanced Level Examination 2022

Dec 2020 – Feb 2023

Combined Mathematics – A | Physics – B | Chemistry – B

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML, CSS, Python, C

Frameworks & Libraries: Spring Boot, React.js, Node.js, Express.js, Next.js

Databases: MySQL, MongoDB

Tools & Platforms: Git & GitHub, Docker, Jenkins, AWS, Postman, GitHub Actions

Security & Auth: JWT, RBAC, Spring Security

AI Integration: Groq API

PROJECTS

Electronics Ordering System | Individual Project

Feb 2026 – May 2026

React.js, Spring Boot, MySQL, JWT, Tailwind CSS, Groq AI, REST APIs

[Source Code](#) | [Live demo](#)

- Designed and implemented secure role-based access control (RBAC) using Spring Security and JWT for separate user and admin workflows.
- Leveraged the Groq AI API to build an asynchronous product comparison feature, minimizing latency for real-time customer assistance.

Medical Appointment Booking System | Individual Project

Mar 2026 – May 2026

React.js, Node.js, MongoDB, Socket.io, Groq AI, Docker, AWS, Jenkins CI/CD

[Source Code](#) | [Live demo](#)

- Built a full-stack hospital management system on AWS with appointment scheduling, real-time chat via Socket.io, and an AI-driven symptom checker using the Groq API.
- Implemented a containerized CI/CD pipeline with Docker, Jenkins, and AWS ECR, using an Application Load Balancer and Auto Scaling for zero-downtime deployments.

Book Fair Management System | Group Project

Oct 2025 – Jan 2026

React.js, Spring Boot, Tailwind CSS, JWT, MySQL, REST APIs, GitHub, QR Code Integration

[Source Code](#)

- Engineered a full-stack stall reservation platform utilizing Spring Boot and React.js, implementing secure JWT-based role authentication to segregate vendor and admin workflows.
- Designed a real-time admin dashboard that tracked stall availability, automated payment processing, and generated dynamic QR codes for booking verification while handling concurrent reservations seamlessly.

CORE COMPETENCIES

- Problem-Solving & Critical Thinking
- Agile/Scrum
- Microservices
- Adaptability & Quick Learner
- OOP & SOLID Principles
- Data Structures & Algorithms

LANGUAGES

English – Proficient | Tamil – Native
